LOCAL NEWS.

The weather gave everybody a surprise yesterday.

The steamer *Mararoa* has not been telephoned up to the time we go to press.

A new board sidewalk is being laid in front of Hollister's drug store, on the corner of Fort and Merchant streets.

Mr. Frank Winter and Miss Kate Mossman will be married at Fort-street Church this evening by Rev. J. A. Cruzan.

If the steamer *Mararoa* arrives before evening, the band will play at the Hawaiian Hotel instead of Emma Square.

The band played to a very good audience on last Saturday afternoon. It gives another concert at the same place this evening at half-past seven o'clock.

The barkentine *Eureka*, which arrived yesterday morning, brought five Guinea hens for Dr. Brodie. She also brought one day's later news than the *St. Paul*.

A report comes by the *Planter* that there are three persons electioneering at Waimea, Kauai, for the Government party. "The combat deepens; on ye brave," etc.

All members of the Young People's Christian Temperance Union are invited to meet at Mrs. Southwick's rooms, at No. 4 Adams lane, this evening at six o'clock.

A fine oil painting of the volcano, copied from a painting by Tavernier by Mr. Geo. Stratemeyer, can be seen at the store of Benson, Smith & Co., on Fort street.

Our Hilo correspondent writes that heavy boots, overcoats and big umbrellas have been in special demand in Hilo for some time past, and at present the rain puts a damper on trade.

There was but a small audience at St. Andrew's Cathedral at the eleven o'clock service yesterday. Neither the Bishop nor the boys of Iolani College were present. The place of the regular organist was filled by a lady.

The merchants who have Christmas goods on hand have been looking pleasanter and feeling better since the sun came out last Saturday. They were very "blue" until the wind blew in the right direction and scattered the rain clouds.

A large audience assembled at Fort-street Church last evening to witness the Christmas Cantata. The programme was carried out very well by the Sunday School scholars. The services were conducted by Rev. J. A. Cruzan.

Flaming posters are about town, announcing the reopening of the Central Park Skating Rink. At the bottom of the poster it is announced that Mullen and Hartman are training, morning and evening, for the championship of the Islands.

"Give me a kiss?" said the Fort street merchant, as he went home the other night and took the baby on his knees. He got the kiss and has been combing 'lasses candy out of his mustache ever since. Moral: Don't get married, boys!

A Chinaman was trying to steer a sick looking horse up Nuuanu street yesterday morning. When near Beretania street the horse refused to go any further. For fully five minutes there was a good deal of swearing in Chinese, which attracted a large crowd.

The pleasant weather of yesterday was taken advantage of by several horse-back parties of young people. Some went to the Pali, some to Waikiki, and a large party of native girls and boys were last seen galloping out the Palama road. The Road Supervisor is reported to have remained at home.

A report comes from Kauai, on very good authority, that a native man at Waimea, Kauai, whose leg below the knee had been hurt and is mortifying, has been refused medical attendance. Our informant states that the Government physician at that place has refused to send the man to the Honolulu Hospital, where he could receive proper attention.

The Royal Hawaiian Band will give a concert at Emma Square this evening at half-past seven o'clock. The following is the programme.

Overture—Part in D major.....Auber
Song—Reaper and Flowers.....Cowan
Waltz—Vienna Bon-Bons.....Strauss
Dance—The Aborigine.....Thiers
Maiden Malama.....Thiers
Reminiscences of Auber.....Godfrey
Waltz—In the Twilight.....Cote
March—Love's Greeting.....Faust
March—Maiden me Ah! Wela.....Berger
"Hawaii Pono!"

The brigantine *Hesperian* arrived at Kahului on the 10th inst., 47 days from Departure Bay, with a cargo of coal, consigned to Wilder & Co. The pilot was compelled to anchor her off point, on account of unfavorable winds, where she remained until the 13th inst., owing to no change in the weather that would allow her to enter the harbor. On the 13th inst., at three o'clock in

the morning, she parted one of her chains, and dragging the remaining anchor, she drifted on to the reef to the southwest of the harbor. The perilous condition she was in was witnessed from the shore where a boat was manned, and put off to the unfortunate vessel. There was a heavy sea running and large breakers were sweeping the decks of the vessel at the time. Everybody on the vessel was saved, through the bravery of the natives in the boat, which put out from shore. The vessel and cargo were sold at public auction on the 14th inst., Hon. Samuel Parker being the purchaser, the entire lot bringing \$720. The vessel was insured for the sum of \$5,000. The cargo was also insured.

They say: that one of our worst officials will be deeply interested in the Mormon news; that the Liberal victory in England is not such a big thing after all; that the weather played a good joke on the "chronic growlers" yesterday; that the town was all out for a walk in the sunshine yesterday; that the weather of yesterday restored the roads to their normal (miserable) condition, as foretold by the Government organ; that the Road Supervisor's salary ought to be given to the lepers in good weather and refunded to the tax-payers in bad weather; that the Islands would all go Democratic if annexed to the United States under Cleveland; that Hawaii received the tail end of the late storm at Panama; that the December fashions have the appearance of a circus; that the men who hold office firmly believe that all the world is leagued together to get them away from the will; that the wedding bells will ring several times during the Christmas holidays; that the petty strifes of office-seekers are degenerating into personal quarrels; that the soldiers who are now eating Government poi and hiding in Dutch uniforms will get *haka* after the next Legislature meets; that Colonel Spreckels is getting tired of his Government circus; that he has decided to change political clowns next year; that the people generally will be with him in such a move; that the early cat gets the sweet milk—from the door step; that the gay deceiver sometimes gets deceived; that the police officers will now have a chance to sleep at nights without getting wet; that the Hawaiian dandy will be a candidate for the Secretaryship of the next Legislature; that the late weather has been prolific of toothache; and that the Government party has got political dyspepsia.

He to Rise.

At the Bethel Union Church yesterday morning the Rev. E. C. Oggel, the pastor, continued his series of sermons on the Apostles' Creed. His theme was, "The third day He rose again from the dead." The text was, "Who is he that condemneth? It is Christ that died, yea rather, that is risen again." Romans 8: 34.

The preacher said: "In the economy of salvation the manger has its place; so has the garden and prominently the Cross. Yet the death did not complete the work of Christ. True, in one sense, the stupendous task of Christ culminated on Calvary. I admit the importance of the death in the programme of redemption. It has been put into song:

"He left His starry crown
And laid His robes aside;
On wings of love came down
And wept and bled and died."

Now if the death had been the termination of Christ's career, the composer would have closed his hymn with the dying Jesus. But not so, for the song continues:

"From the dark grave He rose
The mansion of the dead;
And thence His mighty foes
In glorious triumph led."

And likewise scripture says: "It is Christ that died, yea rather, that is risen again. Hence the death was not the artist's finishing touch to the painting; for the resurrection was to follow. And the Apostles made the theme of their preaching: "Christ, arisen, living Redeemer, mighty to pardon and to save."

The Latest American Invention.
THE VICTORY OF ELECTRICITY.

Since Electricity has been applied for lighting purposes, all efforts of inventors have been directed to construct a lamp for general domestic use. The reason why this problem has till now not been solved, is that none of the inventors could rid themselves of the idea of gas lighting; and that all have adhered to the system of producing the Electricity in some central place, or by large machinery, instead of first laying down the principle that a Lamp which should ever become generally useful and popular, must be portable, like an Oil Lamp, and contain the generator of Electricity in itself, i. e., in the foot of the Lamp.

The Norman Electric Light Company has at last succeeded in completely realizing this ideal of Electric Lighting, and there is no doubt that this most important invention will bring about a complete revolution in all branches of lighting.

Our Electric Lamp needs neither Machinery, Conductors, nor any expensive outlay, and is neither complicated nor disagreeable in manipulation; all that is necessary is to refill it every four or five days with acid. The cost of lighting will be as cheap as gas (3/4 cents per hour), and it has before the latter the immense advantage of neither producing heat, smoke nor carbonic acid, owing to which the air is not impured, and remains at the same degree of temperature. It is further absolutely inodorous, and does not need to be kindled by match, or otherwise, but simply by turning the key, thus avoiding all danger of fire, explosion or suffocation, as in the case of gas, if the key is left open; and it must be conceded that this advantage alone is invaluable. It is further preferable to any known kind of lighting for the following reasons:

- (1) Its manipulation is so simple that any child can keep it in order.
- (2) That the Lamp is portable, and can be removed like any Oil Lamp, from one place to another.
- (3) That it neither requires the disagreeable fixing of the wick, or the cleaning of the cylinder, as in the case of Oil Lamps.
- (4) That the light produced is a soft and most steady one; that it never flickers, and the flame, though being equal in power of lighting to gas, can be regulated to any degree.
- (5) That every danger of fire is absolutely excluded, as the light will extinguish immediately, if by any accident the glass surrounding the burner should be broken.
- (6) That it will burn even in the strongest wind, completely unaffected, thus being valuable for illuminations, lighting of gardens, corridors, etc.

This Lamp is constructed for the present in three different sizes:

- A. small size. Height of complete Lamp, 14 inches; weight, about 5 pounds; for lighting rooms, cellars, storage houses, powder magazines (or similar places where explosives are kept), coaches, illuminations, gardens, mines, or any other industrial purpose. Price, \$4 per lamp, delivered free to any part of the world.
- B. medium size. Serves all domestic purposes for lighting rooms, houses, etc. This Lamp is elegantly decorated, and has removable white Globe, decorated most tastefully, and the workmanship is both first-class and elegant. Price \$4 10. Foot of Lamp is either Bronze, Japanese, Faience or Silver Oxide.
- C. grand size for Parlor, Hall, Saloon, Public Building, etc. The Lamp gives a most brilliant and steady light, has large, removable white Globe, decorated most tastefully, and the workmanship is both first-class and elegant. Price \$4 10. Foot of Lamp is either Bronze, Japanese, Faience or Silver Oxide.

Any special size or design made to order. Estimates furnished.

All Lamps are ready for immediate use, and will be sent, securely packed in strong wooden box, with printed directions for use, a quantity of chemicals sufficient for several months' lighting, and one extra burner for size A, and two for sizes B and C. The necessary chemicals can be purchased in any drug store, in even the smallest village.

Every Lamp is accompanied by a written guarantee for one year, and will be exchanged or money refunded, if the same should not give complete satisfaction.

On all orders for six Lamps and above, a discount of six per cent. will be allowed. No orders from abroad filled, unless accompanied by a remittance to cover the amount, or first-class reference on a New York or Philadelphia house.

The best method of sending money is by draft on New York, which can be procured of any banker, or anywhere, or enclose the amount in bank notes, gold coin, or postage stamps of any country of the world.

All orders, the smallest as well as the most important, will receive the same particular attention, and will be forwarded without delay.

Our Electric Lamps are protected by law, and all imitations and infringements will be prosecuted.

Agents, Salesmen on Commission, and Consignees for our Lamps, wanted everywhere. No special knowledge or capital required.

A fortune to be made by active persons.
